Subject: Receipt of a document purportedly from you. I suspect fraud.

Dear Ms. Freidenrich,

I was about to send in payment as requested. But recent experience caused me to hesitate and question whether these are legitimate documents issued by legitimate public officers operating with the lawful delegated authority required of Constitutional process.

They appear to look normal, but I am quickly reminded that I received similar like type documents from what seemed to be agencies like the IRS and the Department of Revenue, further prompted me to call upon the services of USPS fraud investigators to confirm the legitimacy of the letters.

This is a system-generated email message. Please do not reply to this message.

No more correspondence was received from the agencies I mentioned...so it appears they must have been using the postal service to defraud the public.

May I impose upon you to review the matter and resend me the documents you personally certify as accurate and legitimate. And one
more requirement please… I need to ensure you are lawfully credentialed to function in your public office. For your convenience… A Citizen Asks; Who Are You? Your oath of office and identifying information regarding your surety performance bond are both great places from where to begin.

This message is being faxed to you as well as sent via your official email. The fax will provide proof of service dated today.

Look forward to receiving the certified documents as specified by Monday, November 13, 2017.

Please confirm the date meets your ability to comply with my wishes.

There are also a few more things about which I have some questions, but first, let us get the matter of your credentials resolved first.

Thank you for your courtesy,

Dear Mr. Rosner:

It appears that you may have received a property tax bill and are planning on making payment. You can go to our website and view and print your property tax bill to ensure that the one that you received is a valid property tax bill issued by the County. The website is ocgov.com/octaxbill and then input either your APN or physical address and click find.

Dear Ms. Freidenrich,

Thank you for responding. Yes your description sounds like the type documents to which I was referring.

Thank you for your advice and workaround in making payment. That would seem to be a way that would work, provided the email address provided was proper: ocgov.com/octaxbill

Now that presents another problem…perhaps you would be kind enough to explain…

The official link to the county site is: https://www.ocgov.com/
Just to confirm...Is this correct?

Is this a good time to raise some other serious questions impacting most residents of Orange County? They are relating to these matters?

Please advise...

Dear Mr. Kim,

Thank you for what appears to be your autoresponder machine created message.

Now that is really a shame. This response I just received is very disappointing.

I was directed to contact Mr. Kim by the Orange County Treasurer and it appears there is no effective way to reach him. There does not appear to be any published public e-mail link provided. And e-mail is considered the current lawfully accepted method of communication, especially with the lawful public officials who represent the the people by whom they were elected, and only exist to perform the work of the people. Isn’t that so?

The Brown Act so states this principle: 
http://www.leginfo.ca.gov/cgi-bin/displaycode?section=gov&group=54001-55000&file=54950-54963
GOVERNMENT CODE
SECTION 54950-54963
54950. In enacting this chapter, the Legislature finds and declares that the public commissions, boards and councils and the other public agencies in this State exist to aid in the conduct of the people's business. It is the intent of the law that their actions be taken openly and that their deliberations be conducted openly.

The people of this State do not yield their sovereignty to the agencies which serve them. The people, in delegating authority, do not give their public servants the right to decide what is good for the people to know and what is not good for them to know. The people insist on remaining informed so that they may retain control over the instruments they have created.

Now why would that be...? Surely the man who is in charge of running the people's functional organization would be accessible.

That would appear to be a direct conflict in the spirit of transparency and openness in government that is
being promoted at the official Orange County
government site as referred to me by Ms. Freidenrich.

http://www.ocgov.com/gov

Perhaps I am in error. Is Mr. Kim, the CEO, a public
servant?
